**FULL SERVICE
RENTAL**

0 concerns
0 additional costs

Use the vehicle every day with a worry-free heart – **we take care of everything** for You.

REFRESH YOUR PICK WHEN YOU'RE RENEWING THE CONTRACT

Full Service Rental for Life

Upgrade your habits, there's a better way –
with a flat monthly rate, all-inclusive service and a fresh
Tesla every two or three years.

- ➔ **Forget about boring leases**, seize the opportunity and choose our full service rental at a flat rate, then simply renew the contract and enjoy a fresh vehicle.
- ➔ Our premium solutions provide you with a chance to pick a **newer Tesla** after each rental period.
- ➔ It's a **smart approach** to always having the latest vehicle on the market!

Beast Full Service Rental – **the modern solution.**

FULL SERVICE RENTAL

What is it?

Also known as a Full Service Lease or Subscription – means that **all activities and costs related to the use of a vehicle are combined under one service and a monthly payment.** It is a convenient way to start using a new or lightly driven vehicle. Beast's full service rental is an optimized solution that helps keep your monthly budget stable while maximizing convenience.

Take an important step for the benefit of the environment while improving your **quality of life.** Spend time on people and projects that matter to you most and allow us to make sure that you have a well-kept vehicle always at the front door and a reliable partner with a helping hand just one call away.

PREMIUM VEHICLES WITH A CLEAR CONCIENCE

Drive a Tesla every single day

WHY MANY CHOOSE A TESLA —→

- **Sustainability** – Emissions of carbon dioxide into the air we breathe are a thing of the past. Battery production is the most environmentally damaging part of manufacturing Teslas, but the use of renewable energy makes up for this big time, much more than hybrid vehicles do. For example, if electricity is based entirely on wind energy, the life-cycle greenhouse gas emissions of an electric car are as much as 90% lower than that of a conventional vehicle of similar size.
- **Sound** – Enjoyable peace, less noise in the ears of both the driver & other road users.
- **Range** – The internal design of Tesla batteries is unique and phenomenal. With one charge, you can drive more than just to the grocery store and back, the range of the Teslas in the Beast fleet is an average of 400+ kilometers.
- **Design** – Named as one of the best-looking all-electric vehicles on the market, with aesthetics that are both elegant and sleek (*you just don't get tired of looking at it*).
- **Performance** – Instant acceleration. Even the slowest Tesla leaves conventional cars and even hybrids in the dust.
- **Software** – Tesla's innovative technology. Unlike all other vehicles, a Tesla is updated frequently and continuously. This is possible thanks to constant software updates and the improvements that go along with it are truly noticeable.
- **Autopilot** – A self-driving road-assistant that actually understands its surroundings.

Making a decision has really been simplified – a Tesla knows how to deliver excitement and joy every single day.

MORE OPPORTUNITIES

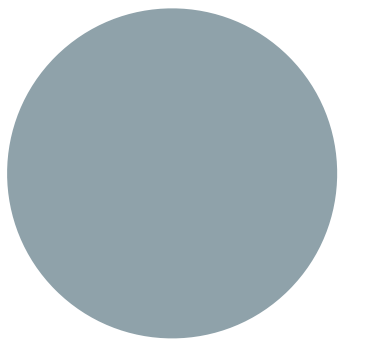

Better than leasing

**WITH OUR SOLUTION YOU NEVER
HAVE TO THINK ABOUT
MAINTENANCE, TIRE CHANGES AND
INSURANCE EVER AGAIN**

Leasing a vehicle comes with a number of liabilities and running costs, not to mention high interest rates.

It is sometimes thought that paying a monthly lease payment to a bank has more advantages because a deposit has been made for the vehicle and logically thinking that should reduce the monthly fees. With this logic it's sometimes forgotten that all other additional services (inspections, repairs, tires) also need a monetary input and these costs tend to grow over time.

Our monthly fixed payment **ensures cost control** for the entire contract period and **we also don't ask for a deposit!**

EVERYONE HAS THEIR PREFERENCES

Premium VS Standard
